

Point-of-Care Scanning

**Making the Smart Choice
for Your Patients and Staff**

Honeywell

Data capture solutions designed to meet the needs of healthcare professionals

Solutions that stand up to regular cleaning with strong disinfectants.

Housings with plastic specifically designed for healthcare applications are the best choice when equipment must be sanitized frequently with harsh chemicals.

Solutions that don't require space on the cart.

Our easily mounted interface module is small enough to be placed virtually anywhere and eliminates the need for a scanner base. This quick, reliable connection to a wireless scanner is ideal for use on a cart on wheels (COW).

Solutions that protect patient data.

Advanced government-certified encryption ensures both accuracy and security when patient data is transmitted wirelessly. With FIPS-140-2 wireless encryption, you will meet HIPAA and government security requirements.

Solutions that are easy to use.

Honeywell's scanners are built to meet the needs of healthcare scanning—all types of bar codes, from the patient bedside to the lab—providing an easy and intuitive solution for your frontline caregivers.
